4. Test & Train

We perform thorough testing on all sites and apps prior to final launch. We simulate heavy stress to measure performance, and test various browsers, operating systems, and devices with the site or app to be sure that it is responsive and performs well across all platforms. We also perform training with your staff, so that they will be able to easily make minor adjustments or publish new content once your site or app is live.

5. Launch

The live launch of your site or app can be a stressful period. Even with thorough testing throughout development, unforeseen challenges can arise. That's why the Kindweb Creations team provides full monitoring and support during the launch period. We stand ready to make sure that your launch is successful, and are ready to quickly address any issues that arise.

6. Support

Once your site launches successfully, you'll still require a technical partner to support ongoing needs. We offer a wide variety of support services for our completed projects, including monitoring and optimization.
